INT.CL. : H04L 29/06 H04L 12/28 H04L 12/40

TITLE : INFORMATION PROCESSOR,
CONTROL METHOD AND
TRANSMISSION MEDIUM

ABSTRACT : PROBLEM TO BE SOLVED: To realize a protocol corresponding to an AV/C command by forming plural connections between equipments executing communication and providing the descriptor of the input and output plugs of the protocol forming plural channels to the respective connections.

SOLUTION: A disk camera 1 is connected to a printer 2. The connection 80 is constituted between a TO plug 44 and a TI plug 73. The data of the channels CH1-N is exchanged in the connection 80. Then, the plug number of the TO plug 44 of the disk camera 1 is 2 so that the data to the channel 2 is outputted. The plug number of the TI plug 73 of the printer 2 is 2 and the channel number is 2. That is, the data outputted from the TO plug 44 of the disk camera 1 passes through the connection 80 as the channel 2 so as to be inputted to the TI plug 73 of the printer 2.
